On-Demand Session | Cheat Sheet

1. Getting URLs for Your Images

You can get the URLs to your images using Cloudinary. Cloudinary lets you easily upload the images and provide the image URLs.

Cloudinary Website URL: https://cloudinary.com/

> **📄 Note**
>
> To Sign up, copy the Cloudinary Website URL and open in new tab.

2. Install Visual Studio Code

- Windows Operating System
- Ubuntu/Linux Operating System (Watch only for 2 minutes)
- Mac Operating System (Watch only for 2 minutes 30 seconds)

3. Linking HTML and CSS Files

We use the HTML `link` element to link the HTML and CSS files. It is a void element.

Syntax:

```html
HTML
1  <link rel="stylesheet" href="tourism.css">
```

> **📄 Note**
>
> You need to add the HTML `link` element in the HTML `head` element.
